

Joyfully fueled, thanks to  
NORDIK MOTOR CANADA!

## STORM 400, 500 & 700 SE

FINAL ASSEMBLY  
IN CANADA

The new STORM is a real 2 passenger ATV, designed and now available in three versions, 400, 500 and 700, in order to meet the needs of a broader customer base. Its main qualities are its manoeuvrability and versatility, as its transmission has a low range mode for heavy work and a high range mode in order to enable it to reach a top speed of nearly 100 km / h \*. The STORM is equipped with a DELPHI electronic power system that provides an excellent response when accelerating, while maintaining fuel efficiency. The "deluxe" version, the 700 SE, is fully equipped with the new electrical power steering system (EPS), ideal for the person who likes to work hard in hilly areas where space is often restricted or who wishes to use a track system on his or her quad.
